The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply								
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

2. Claim 9-11, 15-16, 18-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Freud (4429343).

Freud teaches a capacitance sensing type comprising 1<sup>st</sup> (set of fingers 12) and 2<sup>nd</sup> (set of fingers 14) base components with a plurality of projecting finger shaped electrodes that are laterally offset from one another, and wherein the projection electrodes of the 1<sup>st</sup> component are positioned in opposing orientation to the projecting electrodes of the 2<sup>nd</sup> such that the projecting electrodes of the 1<sup>st</sup> and 2<sup>nd</sup> components at least partially overlap (view figures), and one fixing element (substrate 10) for fixing the f1st and 2<sup>nd</sup> components in position with respect to one another, wherein the fixing element (substrate) is positioned outside of an area where the projecting electrodes of the 1<sup>st</sup> and 2<sup>nd</sup> components overlap (just as much as the applicant's).

The claims are limited to a capacitive sensor therefore; the preamble of claim 9 is not afforded any patentable weight.

"If the body of a claim fully and intrinsically sets forth all of the limitations of the claimed invention, and the preamble merely states, for example, the purpose or intended use of the invention, rather than any distinct definition of any of the claimed invention's limitations, then the preamble is not considered a limitation and is of no

significance to claim construction. Pitney Bowes, Inc. v. Hewlett-Packard Co., 182 F.3d 1298, 1305, 51 USPQ2d 1161, 1165 (Fed. Cir. 1999)." See MPEP 2111.02.

As to claim 10, Freud teaches the capacitance sensing type have two sets of inter digitated fingers (abstract).

As to claim 11, Freud teaches/shows the 1<sup>st</sup> and 2<sup>nd</sup> components are in a common plane.

As to claims 15-16, Freud teaches/shows the fixing element (substrate) is framing the two sets of fingers.

As to claim 18, Freud shows a one-piece substrate (pressed screen).

As to claims 19-20, Freud teaches two sets of fingers of thin film platinum are covered by a coating of water absorbing material (abstract).

### Allowable Subject Matter

3. Claims 12-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### Closing

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Katina M. Wilson whose telephone number is 571-272-2209. The examiner can normally be reached on Mon-Fri 6:15am-4:00pm, off on Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hezron E. Williams can be reached on 571-272-2209. The fax phone
